NutriCheck

Indian Diet Analyzer — Report generated: 2026-10-25

Educational tool only. Not medical advice. Based on one-day food recall.

Profile Summary

Field	Value
Age	28 years
Sex	Female
Height	160 cm
Weight	58 kg
Activity Level	sedentary
Goal	analyze
Diet Type	vegetarian
Daily Calorie Target	1535 kcal/day
Daily Protein Target	58 g/day (practical)

Nutrition Score: 67/100

Component	Score Earned	Max Points
Calorie adequacy	20.0	20
Macro balance	11.5	15
Protein vs target	11.4	15
Fibre vs target	5.9	10
Micronutrients	8.9	30
Moderation	9.0	10
Total Score	67	100

Nutrient Intake vs ICMR Target

Nutrient	Intake	Target / Guide	% of Target / Status
Calories (kcal)	1610	1535	105%
Protein (g)	44.0	58.0	76%
Fibre (g)	18.0	30.7	59%
Iron (mg)	~10.3	29	36%
Calcium (mg)	~363	1000	36%
Vitamin C (mg)	~34	65	52%
Vitamin B12 (µg)	~0.5	2.2	23%

Nutrient	Intake	Target / Guide	% of Target / Status
Vitamin D (µg)	~0.2	15	1%
Sodium (mg)	~1130	"d 2 0 0 0	Within guide
Added Sugar (g)	~5	"d 2 5	Within guide

Smart Food Swaps

Instead of	Try	Reason
Rice	Brown Rice	Brown rice offers 3x the dietary fibre and higher micronutrients with a lower glycemic response.
Samosa	Sprouts	Sprouts provide over double the protein, zero deep-frying, and 10x less sodium than a samosa.
Samosa	Fruit Chaat	Fruit chaat cuts saturated fat and sodium while providing essential Vitamin C and fibre.

Scientific Data Sources

• ICMR-NIN "Nutrient Requirements for Indians — RDA and EAR 2020"

• ICMR-NIN "Dietary Guidelines for Indians 2024"

• Indian Food Composition Tables 2017 (IFCT), Longvah T. et al., NIN Hyderabad

• NFHS-5 National Family Health Survey 2019–21

Limitations: This is a one-day food recall estimate. Micronutrient values are approximate (IFCT 2017 estimates).
